WORKSHOP

Molecular Basis of Heparin Action
Chairman: *E. R. Simon*

Introductory Session

Introductory remarks. *E. R. Simon* 9
Chemistry of the hemostatic mechanism and its relationship to the action of heparin. *R. D. Rosenberg* 10
Structure and biosynthesis of heparin-like polysaccharides. *U. Lindahl, M. Höök, G. Bäckström, I. Jacobsson, J. Riesenfeld, A. Malmström, L. Rodén and D. S. Feingold* 19
Interaction between proteins and glycosaminoglycans. *T. C. Laurent* 24

Session I

Chemical aspects of heparin action

Isotopic procedures in the structural analysis of heparin. *J. E. Shively and H. E. Conrad* 28
Heparin manufacturing processes. *E. Coyne* 32
Studies on the mechanism of heparin action by modification of its structure. *I. Danishefsky* 33
The concept of macromolecular heparin and its physiological significance. *A. A. Horner* 35
Structural requirements for the interaction of heparin with antithrombin III. *J. Riesenfeld, M. Höök, I. Björk, U. Lindahl, and B. Ajaxon* 39
The uses of degradative enzymes as tools for identification and structural analysis of glycosaminoglycans. *A. Linker and P. Hovingh* 43

Session II

Biological aspects of heparin action

Heparin and platelet function. *M. B. Zucker* 47
Purification and properties of platelet factor 4. *R. I. Handin* .. 50
Interaction of heparin with thrombin and antithrombin III. *R. D. Feinman and E. H. H. Li* 51
Heparins: varying effects on cell proliferation in vitro and lack of correlation with anticoagulant activity. *M. M. Lippman and M. B. Mathews* 55
Heparin–lipoprotein lipase interactions. *T. Olivecrona, G. Bengtsson, S.-E. Marklund, U. Lindahl and M. Höök* 60
Current dilemmas in the clinical use of heparin. *S. Wessler* ... 66
Probable physiologic functions of heparin. *H. Engelberg* 70

Session III

Physical aspects of heparin action

Details of glycosaminoglycan conformations and intermolecular interactions. *S. Arnott and W. T. Winter* 73
Effect of α-L-iduronate conformation on the molecular shape of heparin. *E. D. T. Atkins and I. A. Nieduszynski* 78
Physicochemical properties of heparin, and its interaction with Cu(II) and calcium in relation to anticoagulation. *S. S. Stivala* 83
Rapid molecular size characterization of heparins by high pressure liquid chromatography. *N. Sugisaka and F. J. Petracek* . 89
The heterogeneity of heparins. *S. E. Lasker* 92
Polysaccharide–polypeptide systems as models for heparin interactions. *J. Blackwell, K. P. Schodt and R. A. Gelman* 98
Optical conformation of heparin and heparin complexes with cationic dyes, amines and protein models. *A. L. Stone* 101
NMR spectroscopy of heparin. *A. S. i n* 106

Summary session

General discussion. Chaired by *E. F. Neufeld and H. L. Nossel* . 110
Summary of workshop. *E. F. Neufeld and H. L. Nossel* 115

SYMPOSIUM

Pharmacology Training for the Agricultural Sector
Cochairmen: *H. C. Stanton and L. E. Davis*

Introduction. *H. C. Stanton and L. E. Davis* 117
Pharmacology training in schools of veterinary medicine. *L. E. Davis* 119
The need for comparative pharmacologists in industrial and academic research. *H. C. Stanton* 124
The role of the pharmacist in drug information for the agricultural sector. *R. B. Nelson* 127
Undergraduate pharmacological training programs applicable to agricultural science majors. *L. G. Stark* 130

Number 2. FEBRUARY 1977

OPINION

The growing federal presence in human investigative studies. *F. G. Hofmann* 133

NEWS ... 135

BOOKS RECEIVED ... 136

SYMPOSIUMS

Experimental Models for the Study of Obesity
Chairman: *J. Mayer*

Introductory remarks. *G. A. Bray* 137
The hypothalamic syndrome in rats. *S. D. Morrison* 139
Gold thioglucose obesity syndrome. *A. F. Debons, I. Krimsky, M. L. Maayan, K. Fani and F. A. Jimenez* 143
The Zucker-fatty rat: a review. *G. A. Bray* 148
Dietary-induced overeating in experimental animals. *R. B. Kanarek and E. Hirsch* 154

SYMPOSIUMS

Experimental Models for the Study of Obesity
Chairman: *J. Mayer*

Introductory remarks. *G. A. Bray* 137
The hypothalamic syndrome in rats. *S. D. Morrison* 139
Gold thioglucose obesity syndrome. *A. F. Debons, I. Krimsky, M. L. Maayan, K. Fani and F. A. Jimenez* 143
The Zucker-fatty rat: a review. *G. A. Bray* 148
Dietary-induced overeating in experimental animals. *R. B. Kanarek and E. Hirsch* 154

Perfused Tissues and Organs in Nutritional Studies
Chairman: *L. R. Drewes*

Introduction. *L. R. Drewes* 159
Isolated perfused lung—substrate utilization. *D. F. Tierney, S. L. Young, J. J. O'Neil and M. Abe* 161
Nutrient transport systems in dog brain. *L. R. Drewes and D. D. Gilboe* 166
Effect of starvation on muscle glucose metabolism: studies with the isolated perfused rat hindquarter. *N. B. Ruderman, M. N. Goodman, M. Berger and S. Hagg* 171
Vascular perfusion of rat small intestine: metabolic studies with isolated and in situ preparations. *H. G. Windmueller and A. E. Spaeth* 177
Metabolism of chylomicrons in perfused adipose and mammary tissue of the rat. *R. O. Scow* 182

Metabolism of Dietary Components in the Rumen Ecosystem
Chairman: *D. E. Bauman*

Introductory remarks. *D. E. Bauman* 186
Dietary fiber components: relationship to the rate and extent of ruminal digestion. *D. R. Mertens* 187
Rumen bacteria: interaction with particulate dietary components and response to dietary variation. *K.-J. Cheng, D. E. Akin and J. W. Costerton* 193
Ruminal microbial yields: factors influencing synthesis and bypass. *F. N. Owens and H. R. Isaacson* 198

Idiotypy as a Molecular and Cellular Probe
Chairman: *J. D. Capra*

Introduction. *J. D. Capra* 203
Towards a chemical definition of idiotypy. *J. D. Capra* 204
Relation of a cross-reactive idiotype to genetic control of the immune response. *A. Nisonoff and S-T. Ju* 207
The use of idiotypes as markers for antibody variable regions in the rabbit. *J. A. Sogn, J. E. Coligan and T. J. Kindt* 214
Complementary idiotypy in the regulation of the immune response. *H. Köhler, D. A. Rowley, T. DuClos and B. Richardson* .. 221

CONFERENCE

Glucose Recycling and Gluconeogenesis
Chairmen: *C. F. Ramberg, Jr., and M. Vranic*

The role of tracer methodology in the study of glucose recycling and gluconeogenesis in vivo. *C. F. Ramberg, Jr.* 225
Gluconeogenesis: methodological approaches in vivo. *J. L. Chiasson, J. E. Liljenquist, W. W. Lacy, A. S. Jennings and A. D. Cherrington* 229
Estimating rapid changes in the rates of glucose production from glycogenolysis and recycling through lactate. *J. Radziuk and M. Vranic* 236
The turnover and conversion to glucose of alanine in newborn and grown dogs. *S. E. H. Hall, R. Goebel, I. Barnes, G. Hetenyi, Jr., and M. Berman* 239
Use of ^{3}H and ^{14}C doubly labeled glucose and amino acids in the study of hormonal regulation of gluconeogenesis in rats. *A. Dunn, M. Chenoweth and K. Bever* 245
Measurement of glucose recycling and liver glycogen synthesis in mice using doubly labeled substrates. *N. Baker* 253
Glucose transport and recycling determined by means of two tracers and multicompartmental analysis. *D. S. Kronfeld* 259
Integrated control of hepatic glucose metabolism. *R. N. Bergman* 265

FASEB CONFERENCE

Organismal Response to the Environment
Chairman: *H. N. Munro*

Introduction. *H. N. Munro* 1625

SESSION I

Factors in Responses to the Environment
Chairman: *T. R. Tephly*

Introduction. *T. R. Tephly* 1627
Abstracts of papers presented in Session I 1629
The *Salmonella*/microsome test for detection of carcinogens as mutagens. *B. N. Ames* 1630
Environmental agents altering lung biochemistry. *H. P. Witschi* 1631
Factors involved in heavy metal poisoning. *T. W. Clarkson* 1634
Hepatic alcohol oxidation and its metabolic liability. *R. G. Thurman* 1640
Regulation of drug metabolism in man by environmental chemicals and diet. *A. H. Conney, E. J. Pantuck, K.-C. Hsiao, R. Kuntzman, A. P. Alvares and A. Kappas* 1647

SESSION II

Physiological Responses to the Environment
Chairman: *N. Pace*

Introductory remarks. *N. Pace* 1653
Abstracts of papers presented in Session II 1654
Responses to the thermal environment. *J. A. J. Stolwijk* 1655
Oxygen and carbon dioxide in the regulation of respiration. *R. H. Kellogg* 1658
The opposing physiological effects of high pressures and inert gases. *K. W. Miller* 1663
Weightlessness and gravitational physiology. *D. L. Winter* 1667

SESSION III

Effects of Nutritional Status on Response to the Environment
Chairman: *D. H. Calloway*

Abstracts of papers presented in Session III 1672
Nutrition and the responses to extreme environments. *C. F. Consolazio and D. D. Schnakenberg* 1673
Nutrition and responses to zero gravity. *P. C. Rambaut, M. C. Smith, Jr., C. S. Leach, G. D. Whedon and J. Reid* 1678
Nutritional factors in relation to heavy metal toxicants. *O. A. Levander* 1683
Diet, DDT, and the toxicity of drugs and chemicals. *A. E. M. McLean* 1688
Modification by fiber of toxic dietary effects. *D. Kritchevsky* ... 1692

SESSION IV

Pathologic Responses to Environmental Factors
Chairman: *B. Lombardi*

Introductory remarks. *B. Lombardi* ... 1696
Abstracts of papers presented in Session IV ... 1697
Teratogenic effects of environmental chemicals. *J. C. Wilson* ... 1698
Radiation injury: some aspects of the oncogenic effects. *R. J. M. Fry and E. J. Ainsworth* ... 1703
Iatrogenic disease, drug metabolism, and cell injury: lethal synthesis in man. *E. A. Smuckler* ... 1708
Some effects of nitrogen dioxide on the lung. *J. Kleinerman* ... 1714
Influence of environmental stress on pathogenesis of sudden cardiac death. *R. S. Eliot, F. C. Clayton, G. M. Pieper and G. L. Todd* ... 1719

SESSION V

Immunologically Mediated Responses to Nonorganismal Environmental Factors
Chairman: *C. W. Parker*

Effects of the environment on the immune system. *C. W. Parker* ... 1725
Abstracts of papers presented in Session V ... 1726
Allergic responses to airborne allergens and insect venoms. *L. M. Lichtenstein* ... 1727
Immune responses to environmental antigens absorbed through the gastrointestinal tract. *C. W. Parker* ... 1732
Urticaria, angioedema, and mediator release in humans in response to physical environmental stimuli. *N. A. Soter and K. F. Austen* ... 1736
Immune responses to environmental antigens that act on the skin: the role of lymphokines in contact dermatitis. *A. L. de Weck* ... 1742
Effects of cannabinoids on macromolecular synthesis and replication of cultured lymphocytes. *G. G. Nahas, A. Morishima and B. Desoize* ... 1748

SYMPOSIUM

Advances in our Knowledge of the Renin–Angiotensin System
Chairman: *J. O. Davis*

Introductory remarks. *J. O. Davis* ... 1753
New developments in our knowledge of the chemistry of renin. *L. T. Skeggs, M. Levine, K. E. Lentz, J. R. Kahn and F. E. Dorer* ... 1755
The angiotensin I converting enzyme. *E. G. Erdös* ... 1760
[Des-Asp^1]angiotensin II: mediator of the renin–angiotensin system? *R. H. Freeman, J. O. Davis, T. E. Lohmeier and W. S. Spielman* ... 1766
The renin–angiotensin system and the central nervous system. *W. F. Ganong* ... 1771
Comparative physiology of the renin–angiotensin system. *A. A. Taylor* ... 1776
Blockade of renin or angiotensin for understanding human hypertension: a comparison of propranolol, saralasin and converting enzyme blockade. *J. H. Laragh, D. B. Case, J. M. Wallace and H. Keim* ... 1781

SYMPOSIUMS

Light Energy Transduction by the Purple Membrane of Halophilic Bacteria
Organizers: *M. R. Heinrich and J. K. Lanyi*
Moderators: *W. Stoeckenius and D. Oesterhelt*

Introduction. *W. Stoeckenius* ... 1797
Structural studies on *Halobacterium halobium* bacteriorhodopsin. *L. M. Keefer and R. A. Bradshaw* ... 1799
The photochemical cycle of bacteriorhodopsin. *R. H. Lozier and W. Niederberger* ... 1805
Photochemical and chemical studies on the chromophore of bacteriorhodopsin. *T. Schreckenbach and D. Oesterhelt* ... 1810
Proton translocation by ATPase and bacteriorhodopsin. *Y. Kagawa, K. Ohno, M. Yoshida, Y. Takeuchi and N. Sone* ... 1815
Conformational changes in bacteriorhodopsin accompanying ionophore activity. *L. Packer, T. Konishi and P. Shieh* ... 1819
Light-dependent cation gradients and electrical potential in *Halobacterium halobium* cell envelope vesicles. *J. K. Lanyi and R. E. MacDonald* ... 1824
Light-activated amino acid transport in *Halobacterium halobium* envelope vesicles. *R. E. MacDonald and J. K. Lanyi* ... 1828
Light energy conservation processes in *Halobacterium halobium* cells. *R. A. Bogomolni* ... 1833

Comparative Cellular and Pharmacologic Actions of Neurohypophyseal Hormones on Smooth Muscle
Chairman: *B. M. Altura*

Introductory remarks and dedication to J. Rudinger. *B. M. Altura* ... 1840
Evolution of neurohypophyseal hormones and their receptors. *W. H. Sawyer* ... 1842
Design of neurohypophyseal peptides that exhibit selective agonistic and antagonistic properties. *M. Manning, J. Lowbridge, J. Haldar and W. H. Sawyer* ... 1848
Vascular smooth muscle and neurohypophyseal hormones. *B. M. Altura and B. T. Altura* ... 1853
Characterization of oxytocin receptors in the uterus and mammary gland. *M. S. Soloff, B. T. Schroeder, J. Chakraborty and A. F. Pearlmutter* ... 1861
Cyclic nucleotides in the cellular action of neurohypophyseal hormones. *T. P. Dousa* ... 1867
Identification of sites in oxytocin involved in uterine receptor recognition and activation. *R. Walter* ... 1872

Environmental Contaminants and Their Nutritional Impact
Moderator: *D. H. Baker*; Chairman: *D. Polin*

Introduction. *D. H. Baker* ... 1879
The impact of contamination by organochlorine insecticides on poultry nutrition and feeding. *E. C. Naber* ... 1880
Effects of PCBs, DDT, and mercury compounds in chickens and Japanese quail. *M. L. Scott* ... 1888
The biological effects of polybrominated biphenyls in avian species. *R. K. Ringer and D. Polin* ... 1894
Interrelationships of mycotoxins with nutrition. *P. B. Hamilton* ... 1899

Selected Topics in History of Nutrition
Chairman: *H. G. Day*

Introduction. *H. G. Day* ... 1903
Why study nutrition history? *G. M. Briggs* ... 1905
The first two decades of vitamin E. *K. E. Mason* ... 1906
Agnes Fay Morgan and early nutrition discoveries in California. *G. A. Emerson* ... 1911

The founding of the American Institute of Nutrition, including commentaries on the founders. *H. H. Williams* 1915
Reprinted from March 1 issue 1919

SYMPOSIUMS

Gastrointestinal Hormones: Physiological Implications
Chairman: *L. R. Johnson*

Introduction. *L. R. Johnson* 1929
Physiological effects of gastrointestinal hormones. *M. I. Grossman* 1930
Regulation of gastric acid secretion. *H. T. Debas* 1933
Adenylyl cyclase and gastric acid secretion. *W. J. Thompson, G. C. Rosenfeld and E. D. Jacobson* 1938
Trophic effects of gastrointestinal hormones: physiological implications. *M. R. Enochs and L. R. Johnson* 1942
Gastrin heterogeneity: biological significance. *J. H. Walsh* 1948

Localization of Hypophysiotropic Neurohormones
Chairman: *S. M. McCann*

Introduction. *S. M. McCann* 1952
Localization of hypophysiotropic neurohormones by assay of sections from various brain areas. *L. Krulich, M. Quijada, J. E. Wheaton, P. Illner and S. M. McCann* 1953
Neurotransmitters and hypothalamic hormones in the central nervous system. *M. Brownstein* 1960
Localization of hormone secreting pathways in the brain by immunohistochemistry and light microscopy: a review. *E. A. Zimmerman* 1964
Ultrastructural localization of some hypothalamic hormones. *P. C. Goldsmith* 1968
Steroid hormone target cells in the periventricular brain: relationship to peptide hormone producing cells. *W. E. Stumpf and M. Sar* 1973
Role of hypophysiotropic neurohormones in mediating neural and behavioral events. *R. L. Moss* 1978

Control of Endogenous Triglyceride Metabolism in Adipose Tissue and Muscle
Chairman: *J. J. Lech*

Perspectives. *J. J. Lech* 1984
Hormone-sensitive lipase of adipose tissue. *D. Steinberg and J. C. Khoo* 1986
Perifused adipose cells, quantitation and kinetics of lipolysis. *D. O. Allen, A. S. Katocs, E. A. Gardner, E. E. Largis and J. Ashmore* 1991
Regulation of triglyceride metabolism in the isotopically prelabeled perfused heart. *M. F. Crass III* 1995
Effects of drugs and hormones on lipolysis in heart. *J. J. Lech, G. J. Jesmok and D. N. Calvert* 2000
Integration of lipid utilization with Krebs cycle activity in muscle. *P. W. Hochachka, J. R. Neely and W. R. Driedzic* 2009

Iron Absorption and Nutrition
Chairman: *H. N. Munro*

Introduction. *H. N. Munro* 2015
The mechanism of iron absorption and its regulation. *M. C. Linder and H. N. Munro* 2017
Serum ferritin and iron stores. *A. Jacobs* 2024
Absorption of food iron. *J. D. Cook* 2028

WORKSHOP

Oscillator Theory and Neurophysiology
Chairman: *T. Pavlidis*

Introduction: *T. Pavlidis and H. M. Pinsker* 2033
Circadian rhythmicity in the nervous system of crustaceans. *H. Aréchiga* 2036
Sustained oscillations, entrainment and lateral inhibition in the crayfish visual system. *H. B. Nudelman and R. M. Glantz* 2042
Synaptic modulation of endogenous neuronal oscillators. *H. M. Pinsker* 2045
Manipulation of a neuronal circadian oscillator with inhibitors of macromolecular synthesis. *B. S. Rothman and F. Strumwasser* 2050
Application of the mathematics of coupled oscillator systems to the analysis of the neural control of locomotion. *P. S. G. Stein* 2056

Newer Aspects of Cardiac Glycoside Action
Cochairman: *A. Schwartz and J. C. Allen*

Introduction. *A. Schwartz* 2207
Ionic currents in cardiac muscle: a framework for glycoside action. *G. W. Beeler, Jr.* 2209
Recent advances in cardiac glycoside–Na^+,K^+-ATPase interaction. *E. T. Wallick, G. E. Lindenmayer, L. K. Lane, J. C. Allen, B. J. R. Pitts and A. Schwartz* 2214
Relations among Na^+,K^+-ATPase activity, sodium pump activity, transmembrane sodium movement, and cardiac contractility. *T. M. Brody and T. Akera* 2219
Dissociation of Na^+,K^+-ATPase inhibition from digitalis inotropy. *G. T. Okita* 2225
Relationship between myocardial contractility and the effects of digitalis on ionic exchange. *G. A. Langer* 2231
Immunological reversal of the effects of digoxin. *V. P. Butler, Jr., T. W. Smith, D. H. Schmidt and E. Haber* 2235
Pharmacokinetics of digoxin. *J. E. Doherty, G. V. Dalrymple, M. L. Murphy, J. J. Kane, J. K. Bissett and N. de Soyza* 2242

WORKSHOP

Guinea Pig L_2C Leukemia: Immunological, Virological and Clinical Aspects
Cochairmen: *J. S. Rhim and I. Green*

Introduction. *J. S. Rhim and I. Green* 2247
History and further observations (1954–1976) of the L_2C leukemia in the guinea pig. *E. M. Nadel* 2249
Cytogenetic studies in L_2C leukemia. *J. Whang-Peng* 2255
Overview of the structure and function of the major histocompatibility complex of the guinea pig. *E. M. Shevach and B. D. Schwartz* 2260
Immunological studies of the guinea pig L_2C leukemia. *I. Green, G. Forni, T. Konen, C. Hu, B. D. Schwartz, A. Kask and E. M. Shevach* 2264
Idiotypic determinants on the surface immunoglobulin of neoplastic lymphocytes: a therapeutic target. *G. T. Stevenson, E. V. Elliott and F. K. Stevenson* 2268
Immunization of guinea pigs against L_2C leukemia with live leukemic cells by intradermal inoculation: early and late effects. *L. Gross and Y. Dreyfuss* 2272
Modulation of host immune response against the L_2C guinea pig leukemia. *D. L. Klein and J. W. Pearson* 2276
L_2C leukemia: a model of human acute leukemia. *S. G. Murphy and A. F. LoBuglio* 2281
Virological studies of guinea pig leukemia: an overview with reference to herpesvirus and oncornavirus. *G. D. Hsiung* ... 2285
Structural and biochemical analysis of virus-like particles present in guinea pigs with L_2C leukemia. *J. E. Dahlberg, K. Perk and R. Michalides* 2290
Morphology of the guinea pig leukemia associated viruses. *M. L. Vernon, R. C. Knipscher, N. S. More, D. G. Ruch, I. Green and J. S. Rhim* 2297
Endogenous guinea pig retravirus and L_2C leukemia. *D. P. Nayak and A. R. Davis* 2305
Biochemical properties of the B-type retravirus of guinea pigs and an agent in the plasma of guinea pigs with L_2C leukemia. *J. Schlom, R. Michalides, K. Perk, J. Pearson and J. Dahlberg* .. 2310
Characterization of bromodeoxyuridine-induced guinea pig type B retravirus. *D. L. Putman and J. S. Rhim* 2316
Morphogenic studies of herpesvirus and oncornavirus from leukemic and normal guinea pigs. *C. K. Y. Fong and G. D. Hsiung* 2320
In vitro studies on L_2C leukemia: isolation of guinea pig herpes virus from mink cells after cocultivation with leukemic cells. *J. S. Rhim, M. L. Vernon and I. Green* 2328

Number 10. SEPTEMBER 1977

OPINION

APS—Current status, with consideration of its role in FASEB. *E. E. Selkurt* 2333

SPECIAL ARTICLE

Peer review of research grant applications at the National Institutes of Health 3: review by an advisory board/council. *C. Henley* 2335

VIEWPOINTS

From Austria: *G. Kreil*; From *Nature*: *T. H. Jukes* 2339

BOOKS RECEIVED ... 2340

SYMPOSIUMS

Recommendations of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research: Impact on Research in Pharmacology
Chairman: *R. J. Levine*

Introduction. *R. J. Levine* ... 2341
The National Commission and research in pharmacology: an overview. *K. Lebacqz* ... 2344
Prisoner subjects and drug testing. *L. Lasagna* ... 2349
Development of drug therapy for the mentally ill. *G. L. Klerman* ... 2352
Development of drug therapy for children. *S. N. Cohen* ... 2356
Nondevelopmental research on human subjects: the impact of the recommendations of the National Commission. *R. J. Levine* ... 2359

Central Neural Mechanisms of Respiration
Organizer: *M. Kalia*

Introduction. *M. Kalia* ... 2365
Models of respiratory phase-switching. *M. I. Cohen and J. L. Feldman* ... 2367
The functional organization of the respiratory phase-switching mechanisms. *C. von Euler* ... 2375
Gating: a mechanism for selective receptivity in the respiratory center. *J. R. Hildebrandt* ... 2381
Neural control of ventilation in the lamprey. *C. M. Rovainen* ... 2386
Anatomical organization of bulbopontine respiratory oscillators. *A. Hugelin* ... 2390
Vagal contribution to the inspiratory 'off-switch' mechanism. *T. Trippenbach and J. Milic-Emili* ... 2395
Maintenance of respiration by central neural feedback mechanisms. *F. L. Eldridge* ... 2400
Neuroanatomical organization of the respiratory centers. *M. Kalia* ... 2405
The respiratory motoneuron and apneusis. *T. A. Sears* ... 2412
Integration of peripheral and central chemoreceptor stimuli by pontine and medullary respiratory centers. *W. M. St. John* ... 2421
The nature and effects of sensory inputs into the respiratory centers. *A. S. Paintal* ... 2428

Excitable Junctions in Smooth Muscle Cells
Chairman: *J. H. Szurszewski*

Introductory remarks. *J. H. Szurszewski* ... 2433
Cholinergic, adrenergic, and purinergic neuromuscular transmission. *G. Burnstock* ... 2434
Some functional consequences of variation in adrenergic synaptic cleft width and in nerve density and distribution. *J. A. Bevan* ... 2439
Cholinergic inhibition of adrenergic transmission. *P. M. Vanhoutte* ... 2444
Modulation of smooth muscle activity by catecholamines. *J. M. Marshall* ... 2450
Modulation of smooth muscle by nervous activity: a review and a hypothesis. *J. H. Szurszewski* ... 2456

Number 11. OCTOBER 1977

OPINION

The public responsibility of scientific societies. *The Life Sciences Research Office Advisory Committee* ... 2463

MEETING REPORT

The Fifth Annual Meeting of the Mid-West Immunology Conference. *V. A. Lazda* ... 2465
Correction ... 2469

SPECIAL ARTICLE

The extramural role of the NIH as a research support agency. *F. Narin and R. T. Shapiro* ... 2470

NEWS

Wellcome Visiting Professorships ... 2477

SYMPOSIUMS

Comparative Physiology of the Urinary Tract
Chairman: *B. Schmidt-Nielsen*

Introduction. *B. Schmidt-Nielsen* ... 2479
Excretion in insects: function of gut and rectum in concentrating and diluting the urine. *J. E. Phillips* ... 2480
Excretion in lower vertebrates: function of gut, cloaca, and bladder in modifying the composition of urine. *E. Skadhauge* ... 2487
Excretion in mammals: role of the renal pelvis in the modification of the urinary concentration and composition. *B. Schmidt-Nielsen* ... 2493

Special Topics in the History of Nutrition
Chairman: *E. N. Todhunter*

Introduction. *E. N. Todhunter* ... 2504
With Professor A. B. Luckhardt, on the trail of Dr. William Beaumont. *F. C. Bing* ... 2506
Dr. James J. Moorhead, Chicago surgeon. *C. A. Dragstedt* ... 2509
The history of nutrition: a tour of the literature. *W. K. Beatty* 2511
The history of the "antibiotic growth effect." *T. H. Jukes* ... 2514

GRAS REPORT

Evaluation of health aspects of GRAS food ingredients: lessons learned and questions unanswered. *R. G. H. Siu, J. F. Borzelleca, C. J. Carr, H. G. Day, S. J. Fomon, G. W. Irving, Jr., B. N. La Du, Jr., J. R. McCoy, S. A. Miller, G. L. Plaa, M. B. Shimkin and J. L. Wood* ... 2519
Detailed table of contents ... 2521
Background ... 2527
Oganizing operations ... 2529
Assembling relevant data ... 2532
Conducting scientific analyses ... 2534
Arriving at judgments on health hazards ... 2544
Translating scientific assessment into official regulation ... 2547
Perspective ... 2553
References ... 2554
Appendix A. Substances evaluated ... 2557

Number 12. NOVEMBER 1977

OPINION

The years of neglect. *J. G. Horsfall* ... 2563

SPECIAL ARTICLE

The Comroe-Dripps report on the scientific basis for the support of biomedical science. *R. L. Ringler* ... 2564

FEDERATION NEWS

Sources of abstracts for the 1977 FASEB Annual Meeting. *K. F. Heumann and D. W. Heumann* 2566

NEWS ... 2568

SYMPOSIUMS

Drugs and Hypothermia
Chairman: *A. M. Karow, Jr.*

Drugs and hypothermia—who cares? *A. M. Karow, Jr.* 2569
Adrenoceptor sensitivity in disease as assessed through response to temperature alteration. *R. P. Ahlquist* 2572
Cardiac adrenoceptors at low temperature: what is the experimental evidence for the adrenoceptor interconversion hypothesis? *B. G. Benfey* 2575
Discussion of evidence regarding induced changes in adrenoceptors. *M. Nickerson and G. Kunos* 2580
Alterations in temperature and histamine receptor function. *D. A. Cook, T. P. Kenakin and C. A. Krueger* 2584
Drugs that modify cellular responses to low temperature (cryoprotectants): a pharmacological perspective of preserving biological systems by freezing. *M. Shlafer* 2590
Profound hypothermia in mammals treated with tetrahydrocannabinols, morphine, or chlorpromazine. *C. O. Haavik* 2595

Functional and Structural Determinants of Glomerular Filtration
Chairman: *B. M. Brenner*

A brief historical perspective. *B. M. Brenner* 2599
Dynamics of glomerular ultrafiltration in the rat. *R. C. Blantz* 2602
Filtration dynamics in dogs: glomerular capillary pressure. *S. P. Youngberg, G. R. Marchand, W. S. Spielman, H. Osswald and F. G. Knox* 2609
Determinants of the transglomerular passage of macromolecules. *W. M. Deen, M. P. Bohrer, C. R. Robertson and B. M. Brenner* 2614
Structural determinants of glomerular permselectivity. *H. G. Rennke and M. A. Venkatachalam* 2619

Tracer Methods in the Study of Blood–Tissue and Transplacental Exchange
Chairman: *G. Hetenyi, Jr.*

Introduction. *G. Hetenyi, Jr.* 2627
Blood–tissue exchange in liver and heart: the influence of heterogeneity of capillary transit times. *C. A. Goresky and C. P. Rose* 2629
Studies on bone ion exchanges using multiple-tracer indicator-dilution techniques. *P. J. Kelly and J. B. Bassingthwaighte* 2634
Steady-state methods for the study of placental exchange. *J. J. Faber* 2640

Number 13. DECEMBER 1977

OPINION

Wheel spinning in Washington, or another fizzle. *E. L. Hess* .. 2647

NEWS ... 2648

In appreciation 2649

BOOKS RECEIVED ... 2650

SYMPOSIUM

Nonrespiratory Aspects of Lung Physiology
Chairman: *C. Lenfant*

Introduction. *C. Lenfant* 2651

SESSION I

Fetal Development of the Lung

Development of the alveolar structure of the fetal rat in late gestation. *M. C. Williams* 2653
Glucocorticoid receptors in the lung. *P. L. Ballard* 2660
Nutritional and hormonal influences on lung phospholipid metabolism. *I. Gross* 2665
Fetal lung liquids. *R. E. Olver* 2669

SESSION II

Lung Cell Functions

Nonrespiratory functions of pulmonary cells: the mast cell. *R. A. Lewis and K. F. Austen* 2676
Pulmonary endothelial cells. *J. W. Ryan and U. S. Ryan* 2683
The airway smooth muscle cell. *R. F. Coburn* 2692
Alveolar type II cells. *R. J. Mason, L. G. Dobbs, R. D. Greenleaf and M. C. Williams* 2697
Secretory cells. *L. M. Reid* 2703
Macrophage neutral proteinases and defense of the lung. *S. Gordon* 2707

SYMPOSIUM

Mode of Action of Oral Hypoglycemic Drugs
Chaired by: *J. N. Fain*

Introductory remarks. *J. N. Fain* 2712
Pancreatic action of the sulfonylureas. *G. M. Grodsky, G. H. Epstein, R. Fanska and J. H. Karam* 2714
The effects of sulfonylureas on peripheral metabolic processes. *G. S. Levey* 2720
Hepatic effects of oral hypoglycemic drugs. *F. Davidoff* 2724
A hypothesis for the molecular mechanism of action of chlorpropamide in the treatment of diabetes mellitus and diabetes insipidus. *R. M. Zusman, H. R. Keiser and J. S. Handler* 2728
Surfactants alter the oxygen tension of buffers: an artifactual component of the inotropic response to sulfonylureas in rat atria. *J. Linden and G. Brooker* 2730
Inhibition of rat fat cell triglyceride lipase by sulfonylureas. *R. E. Shepherd and J. N. Fain* 2732

Subject Index to Volume 36[1]

A

ACTH, substances modulating its secretion by cultured anterior pituitary cells, **8:** 2094
Adenosine deaminase deficiency and immunodeficiencies, **8:** 2166
Adenylate cyclase, and relationship to the glucagon receptor, **8:** 2115
Adenylyl cyclase and gastric acid secretion, **7:** 1938
Adipose cells, perfused, quantitation and kinetics of lipolysis, **7:** 1991
Adrenergic synaptic cleft width and nerve distribution and density, **10:** 2439
Adrenoceptors
  cardiac, at low temperature: experimental evidence for adrenoceptor interconversion hypothesis, **12:** 2575
  discussion of evidence regarding induced changes in, **12:** 2580
  sensitivity in disease as assessed through response to temperature alteration, **12:** 2572
Airway smooth muscle cell, **13:** 2692
Alanine, turnover and conversion to glucose in dogs, **2:** 239
Alveolar structure of fetal rat in late gestation, **13:** 2653
Alveolar type II cells, **13:** 2697
American Institute of Nutrition, founding of, **6:** 1915
Angiotensin agonists and antagonists, mechanisms and sites of action, **8:** 2128
Angiotensin I converting enzyme, **5:** 1760
[Des-Asp^1]Angiotensin II: mediator of the renin–angiotensin system? **5:** 1766
Antibiotic growth effect, history of, **11:** 2514
Apneusis and the respiratory motoneuron, **10:** 2412
ATPase and bacteriorhodopsin, proton translocation by, **6:** 1815

Author Index

3: 1331; **13:** 2735

B

acteriorhodopsin
  and ATPase, proton translocation by, **6:** 1815
  conformational changes, **6:** 1819
  photochemical and chemical studies on chromophore of, **6:** 1810
  photochemical cycle of, **6:** 1805
Beaumont, Dr. William, on the trail of, **11:** 2506
Blood–tissue exchange in liver and heart: influence of capillary transit times, **12:** 2629
Bone ion exchanges, multiple-tracer indicator-dilution techniques, **12:** 2634

Books Received

2: 136; **5:** 1624; **6:** 1796; **7:** 1928; **8:** 2074; **9:** 2206; **10:** 2340; **13:** 2650

C

ardiac contractility, Na^+,K^+-ATPase activity, sodium pump activity, and transmembrane sodium movement, **9:** 2219
Cardiac glycoside–Na^+,K^+-ATPase interaction, recent advances in, **9:** 2214
Cardiac muscle ionic currents: framework for glycoside action, **9:** 2209
Catecholamines, modulation of smooth muscle activity, **10:** 2450
Chlorpropamide, mechanism of action in treatment of diabetes, **13:** 2728
Cholinergic inhibition of adrenergic transmission, **10:** 2444

[1] This index covers volume 36, with the exception of no. 3, the abstract issue, which carries a permuted subject index, and no. 4, the exhibit guide. For each listing the bold face number refers to the issue number; the second number to the page number.

Chorionic gonadotropin, human, receptor and mechanisms of action, **8:** 2119
Circadian rhythmicity in nervous system of crustaceans, **7:** 2036

Conference

Glucose recycling and gluconeogenesis, **2:** 225–270
Contractile proteins in phagocytosis, **8:** 2181
Corticotropin releasing factor
from bovine hypothalamus, **8:** 2100
from rat hypothalamus, **8:** 2104
tissue, **8:** 2088
Cryoprotectants, drugs that modify cellular responses to low temperature, **12:** 2590
Cyclic nucleotides in cellular action of neurohypophyseal hormones, **6:** 1867

D
Diabetes, hypothesis for a mechanism of action of chlorpropamide, **13:** 2728
Dietary fiber components: influence on ruminal digestion, **2:** 187
Digitalis
effects on ionic exchange, relationship to myocardial contractility, **9:** 2231
inotropy, dissociation of Na^+,K^+-ATPase inhibition from, **9:** 2225
Digoxin
immunological reversal of, **9:** 2235
pharmacokinetics of, **9:** 2242
Dissociation of Na^+,K^+-ATPase inhibition from Digitalis inotropy, **9:** 2225
Drugs
and hormones, effects on lipolysis in heart, **7:** 2000
and hypothermia—who cares? **12:** 2569
that modify cellular responses to low temperature, **12:** 2590
Drug testing and prisoner subjects, **10:** 2349
Drug therapy
for children, **10:** 2356
for the mentally ill, **10:** 2352

E
Employment Opportunities

1: 25a; **2:** 23a; **4:** 87a; **5:** 17a; **6:** 27a; **7:** 21a; **8:** 17a; **9:** 17a; **10:** 29a; **11:** 27a; **12:** 31a; **13:** 27a
Estimating rapid changes in rates of glucose production, **2:** 236
Excretion
in insects: function of gut and rectum, **11:** 2480
in lower vertebrates: function of gut, cloaca, and bladder, **11:** 2487
in mammals: role of the renal pelvis, **11:** 2493

F
FASEB Conference

Organismal response to the environment, **5:** 1625–1752
Session I: Factors in responses to the environment, **5:** 1627
Session II: Physiological responses to the environment, **5:** 1653
Session III: Effects of nutritional status on response to the environment, **5:** 1672
Session IV: Pathologic responses to environmental factors, **5:** 1696
Session V: Immunologically mediated responses to nonorganismal environmental factors, **5:** 1725

Federation News

Annual Meetings of FASEB and member Societies, **1:** 6
Photographic report of the 1977 FASEB meeting, Chicago, Illinois, **8:** 2061

Sources of abstracts for the 1977 FASEB Annual Meeting, **12:** 2566
Fetal lung liquids, **13:** 2669
Filtration dynamics in dogs: glomerular capillary pressure, **12:** 2609
Food iron, absorption of, **7:** 2028

G
Gastric acid secretion and adenylyl cyclase, **7:** 1938
Gastrin heterogeneity: biological significance, **7:** 1948
Gastrointestinal hormones
physiological effects, **7:** 1930
trophic effects, **7:** 1942
Gating: mechanism for selective receptivity in respiratory center, **10:** 2381
Genetic control of immune response, reaction of cross-reactive idiotype to, **2:** 207
Glomerular permselectivity, structural determinants of, **12:** 2619
Glomerular untrafiltration in rats, dynamics of, **12:** 2602
Glucagon receptor, relationship to adenylate cyclase, **8:** 2115
Glucocorticoid receptors in lung, **13:** 2660
Gluconeogenesis
hormonal regulation in rats, **2:** 245
methodological approaches in vivo, **2:** 229
Glucose recycling
and gluconeogenesis in vivo, **2:** 225
and liver glycogen synthesis measured in mice, **2:** 253
Glucose transport and recycling determined by tracers and multicompartmental analysis, **2:** 259
Gold thioglucose obesity syndrome, **2:** 143

GRAS Report

Evaluation of health aspects of GRAS food ingredients: lessons learned and questions unanswered, **11:** 2519–2562
Guinea pigs
leukemic and normal, studies of herpesvirus and oncornavirus, **9:** 2320
major histocompatibility complex, **9:** 2260
retravirus, endogenous, and L_2C leukemia, **9:** 2305
with L_2C leukemia, structural and biochemical analysis of virus-like particles, **9:** 2290
Guinea pig B-type retravirus
and agent in plasma of guinea pigs, **9:** 2310
bromodeoxyuridine-induced, **9:** 2316
Guinea pig leukemia
herpesvirus and oncornavirus, **9:** 2285
associated viruses, **9:** 2297

H
Halobacterium halobium
bacteriorhodopsin, **6:** 1799
cells, light energy conservation, **6:** 1833
cell envelope vesicles, **6:** 1824
envelope vesicles, **6:** 1828
Hepatic glucose metabolism, integrated control, **2:** 265
Histamine receptor function and temperature alterations, **12:** 2584
Hormones and drugs, effects on lipolysis in heart, **7:** 2000
Human hypertension, comparison of propranolol, saralasin and converting enzyme blockade, **5:** 1781
Hypoglycemic drugs, oral, hepatic effects of, **13,** 2724
Hypophysiotropic neurohormones
localization in various brain areas, **7:** 1953
mediating neural and behavioral events, **7:** 1978
Hypothalamic hormones
and neurotransmitters in the central nervous system, **7:** 1960
ultrastructural localization of, **7:** 1968
Hypothalamic syndrome in rats, **2:** 139
Hypothermia
and drugs—who cares? **12:** 2569
profound, in mammals, treated with tetrahydrocannabinols, morphine, or chlorpromazine, **12:** 2595

I
Idiotypes, as markers for antibody variable regions in rabbit, **2:** 214
Idiotypic determinants on surface immunoglobulin of neoplastic lymphocytes, **9:** 2268
Idiotypy: chemical definition of, **2:** 204
Immune response
complementary idiotypy in regulation of, **2:** 221
genetic control, and reaction of a cross-reactive idiotype, **2:** 207
Immunity to *Schistosoma mansoni*, **8:** 2176
Immunodeficiencies and adenosine deaminase deficiency, **8:** 2166
Immunological aspects of renal disease, **8:** 2171
Insecticides, organochlorine, effects on poultry nutrition, **6:** 1880
Iron
absorption, its mechanism and regulation, **7:** 2017
stores and serum ferritin, **7:** 2024
Isolated perfused lung—substrate utilization, **2:** 161

L
L_2C leukemia
and endogenous guinea pig retravirus, **9:** 2305
cytogenetic studies in, **9:** 2255
immunization of guinea pigs with live leukemic cells by intradermal inoculation, **9:** 2272
immunological studies of, **9:** 2264
in the guinea pig, **9:** 2249
in vitro studies on: isolation of guinea pig herpes virus from mink cells, **9:** 2328
model of human acute leukemia, **9:** 2281
modulation of host immune response against, **9:** 2276
Lipase, hormone-sensitive, of adipose tissue, **7:** 1986
Lipid utilization, integration with Krebs cycle activity in muscle, **7:** 2009
Lipolysis in heart, effects of drugs and hormones on, **7:** 2000

Localization
of hormone secreting pathways in brain by immunohistochemistry and light microscopy, **7:** 1964
of hypophysiotropic neurohormones from various brain areas, **7:** 1953
untrastructural, of some hypothalamic hormones, **7:** 1968
Luckhardt, Professor A. B., on the trail of Dr. William Beaumont, **11:** 2506
Lung phospholipid metabolism, nutritional and hormonal influences on, **13:** 2665

Macrophage neutral proteinases and defense of the lung, **13:** 2707
Mast cell: nonrespiratory functions of pulmonary cells, **13:** 2676
Mathematics of coupled oscillator systems and analysis of neural control of locomotion, **7:** 2056

Meeting Report

Fifth annual meeting of the Mid-West Immunology Conference, **11:** 2465
Metabolism of chylomicrons in perfused adipose and mammary tissue of rat, **2:** 182
Moorhead, Dr. James J., Chicago surgeon, **11:** 2509
Morgan, Agnes Fay and early nutrition discoveries in California, **6:** 1911
Mycotoxins, interrelationships with nutrition, **6:** 1899
Myocardial contractility, effects of digitalis on ionic exchange, **9:** 2231

N
Na^+,K^+-ATPase
activity, sodium pump activity, transmembrane sodium movement, and cardiac contractility, **9:** 2219
–cardiac glycoside interaction, **9:** 2214
National Commission and research in pharmacology: an overview, **10:** 2344
Nerve distribution and density and adrenergic synaptic cleft width, **10:** 2439
Neural control of locomotion, analyzed by application of mathematics of coupled oscillator systems, **7:** 2056
Neurohypophyseal hormones
and their receptors, **6:** 1842
and vascular smooth muscle, **6:** 1853
cyclic nucleotides in cellular action, **6:** 1867
Neurohypophyseal peptides, design for selective agonistic and antagonistic properties, **6:** 1848
Neuromuscular transmission, cholinergic, adrenergic, and purinergic, **10:** 2434
Neuronal circadian oscillator, manipulation with inhibitors of macromolecular synthesis, **7:** 2050
Neuronal oscillators, endogenous, synaptic modulation of, **7:** 2045
Neurotransmitters and hypothalamic hormones in the central nervous system, **7:** 1960

Respiration, maintenance by central neural feedback mechanisms, **10:** 2400
Respiratory centers
nature and effects of sensory inputs, **10:** 2428
neuroanatomical organization of, **10:** 2405
pontine and medullary, integration of peripheral and central chemoreceptor stimuli by, **10:** 2421
Respiratory motoneuron and apneusis, **10:** 2412
Respiratory 'off-switch' mechanism, vagal contribution to, **10:** 2395
Respiratory oscillators, bulbopontine, anatomical organization, **10:** 2390
Respiratory phase-switching, models of, **10:** 2367
Respiratory phase-switching mechanisms, functional organization, **10:** 2375
Rumen bacteria: interaction with particulate dietary components and response to dietary variation, **2:** 193
Ruminal microbial yields: factors influencing synthesis and bypass, **2:** 198

Secretory cells, **13:** 2703
Serotonin
and synthesizing enzymes, distribution in discrete areas of the brain, **8:** 2134
biosynthesis, regulation in brain, role of high affinity uptake of tryptophan into serotonergic neurons, **8:** 2142
depleting drugs, action, **8:** 2149
receptors in brain, **8:** 2159
reuptake, inhibition of, **8:** 2154
Serum ferritin and iron stores, **7:** 2024
Smooth muscle
activity, modulation by catecholamines, **10:** 2450
modulation by nervous activity, review and hypothesis, **10:** 2456
vascular, and neurohypophyseal hormones, **6:** 1853

Special Article

Biosynthesis of secretory peptide in honeybee venom glands, **8:** 2081
Conroe-Dripps report on scientific basis for support of biomedical science, **12:** 2564
Extramural role of NIH as research support agency, **11:** 2470
International distribution of biomedical publications, **6:** 1790
Questionnaire study of prevalence of Chinese restaurant syndrome, **5:** 1617
Some reactions in which inorganic pyrophosphate replaces ATP and serves as a source of energy, **9:** 2197
Structure and activation of early components of complement, **9:** 2191
Structure and function of *Escherichia coli* ribosomes, **8:** 2075

Special Report

Peer review of research grant applications at the National Institutes of Health 1: assignment and referral processes, **8:** 2066
Peer review of research grant applications at the National Institutes of Health 2: review by an Initial Review Group, **9:** 2186

Peer review of research grant applications at the National Institutes of Health 3: review by an advisory board/council, **10:** 2335
Survey of sources for history of biochemistry and molecular biology, **8:** 2069
Starvation, effect on muscle glucose metabolism: isolated perfused rat hindquarter, **2:** 171
Steroid hormone cells in periventricular brain: relationship to peptide hormone producing cells, **7:** 1973

Subject Index

3: 1360; **13:** 2737
Sulfonylureas
and inhibition of rat fat cell triglyceride lipase, **13:** 2732
effects on peripheral metabolic processes, **13:** 2720
pancreatic action, **13:** 2714
Surfactants alter the oxygen tension of buffers: artifactual component of the inotropic response to sulfonylureas in rat atria, **13:** 2730

Symposium

Advances in our knowledge of the renin–angiotensin system, **5:** 1753–1787
Central neural mechanisms of respiration, **10:** 2365–2432
Clinical immunology, **8:** 2165–2184
Comparative cellular and pharmacologic actions of neurohypophyseal hormones on smooth muscle, **6:** 1840–1878
Comparative physiology of the urinary tract, **11:** 2479–2503
Control of endogenous triglyceride metabolism in adipose tissue and muscle, **7:** 1984–2014
Drugs and hypothermia, **12:** 2569–2598
Environmental contaminants and their nutritional impact, **6:** 1879–1902
Excitable junctions in smooth muscle cells, **10:** 2433–2461
Experimental models for the study of obesity, **2:** 137–158.
Functional and structional determinants of glomerular filtration, **12:** 2599–2626
Gastrointestinal hormones: physiological implications, **7:** 1929–1951
Idiotypy as a molecular and cellular probe, **2:** 203–224
Iron absorption and nutrition, **7:** 2015–2032
Light energy transduction by the purple membrane of halophilic bacteria, **6:** 1797–1839
Localization of hypophysiotropic neurohormones, **7:** 1952–1983
Metabolism of dietary components in the rumen ecosystem, **2:** 186–202
Mode of action of oral hypoglycemic drugs, **13:** 2712–2734
Nature of corticotropin releasing factor, **8:** 2087–2109
Newer aspects of cardiac glycoside action, **9:** 2207–2246
Nonrespiratory aspects of lung physiology, **13:** 2651–2711
Session I: Fetal development of the lung, **13:** 2653–2675
Session II: Lung cell functions, **13:** 2676–2711
Perfused tissues and organs in nutritional studies, **2:** 159–185
Pharmacology of serotonin neurons in the central nervous system, **8:** 2133–2164
Pharmacology training for the agricultural sector, **1:** 117–132
Polypeptide hormone receptors, **8:** 2110–2132
Recommendations of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research: impact on research in pharmacology, **10:** 2341–2364
Selected topics in history of nutrition, **6:** 1903–1918
Special topics in the history of nutrition, **11:** 2504–2518
Tracer methods in the study of blood–tissue and transplacental exchange, **12:** 2627–2646
Temperature alterations and histamine receptor function, **12:** 2584
Tissue corticotropin releasing factors, **8:** 2088
Tracer methodology, role in study of glucose recycling and gluconeogenesis in vivo, **2:** 225
Transglomerular passage of macromolecules, determinants of, **12:** 2614
Triglyceride metabolism, regulation in isotopically prelabeled perfused heart, **7:** 1995
Vascular perfusion of rat small intestine: metabolic studies with isolated and in situ preparations, **2:** 177
Ventilation in lamprey, neural control of, **10:** 2386

Viewpoints

From Austria, **10:** 2339; From *Nature*, **10:** 2339
Vitamin E, first two decades of, **6:** 1906

W

Workshop

Guinea pig L_2C leukemia: immunological, virological and clinical aspects, **9:** 2247–2332
Molecular basis of heparin action, **1:** 9–116
Introductory Session, **1:** 9
Session I: Chemical aspects of heparin action, **1:** 28
Session II: Biological aspects of heparin action, **1:** 47
Session III: Physical aspects of heparin action, **1:** 73
Summary Session, **1:** 110
Oscillator theory and neurophysiology, **7:** 2033–2059

Zucker-fatty rat: a review, **2:** 148
